

4-SHAFT EXAMPLE OF POLYCHROME SUMMER & WINTER (Liftplan mode & Fiberworks PCW)

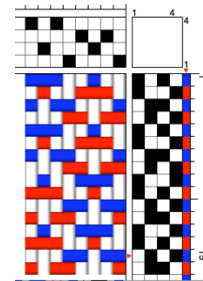

1. Profile drafts for each color:

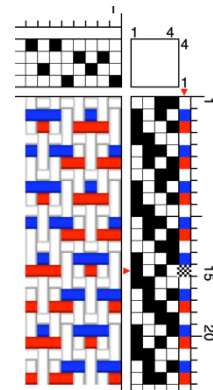

2. SW 1212 substituted into each profile draft w/o tabby and left repeat to 2 (didn't change to 1):

3. Blue draft liftplan interleaved into red draft liftplan without tabby:

4. Tabby added in 2:1 ratio; colors changed to ABC order, white tabby, pattern weft A, pattern weft B:

5. Threading blocks elongated to make squares in draft. Because I left the S&W treading repeats at 2 in Fiberworks PCW, the image was elongated and the threading had to be doubled for symmetry.
